

How To Get Top UPS® Shipping Rates With Worldwide Express

Small-to-medium-sized businesses (SMBs) should continuously look for cost savings as a measure to protect their bottom line. That's why thousands of SMBs across the United States partner with Worldwide Express. As part of the largest non-retail authorized reseller of UPS® in the nation, we negotiate top parcel shipping rates and help customers strategically incorporate UPS services into their shipping program.

How do we secure top shipping rates?

In total, we helped customers ship more than 24 million small packages in 2021. With those kinds of numbers, we can collectively negotiate UPS parcel shipping rates — particularly for companies that consistently move higher volumes.

The Worldwide Express advantage

Can SMBs ship UPS by themselves? Of course! But there are advantages that are only available by working with a leading third-party logistics (3PL) provider like Worldwide Express.

Use insights and reports to create a smart shipping strategy	Manually compile disjointed data to understand your shipping program
Scale between parcel and less-than-truckload to save money and navigate price fluctuations	Use only parcel and pay more for "outlier" shipments (overweight, irregularly shaped, etc.)
