

Ways WWEX Makes Life Easier

Freight Shipping Headaches? Get Relief With WWEX.

At Worldwide Express (WWEX), we're experts on all things freight shipping — including the most common pain points for small and mid-sized business (SMB) shippers. Read on to learn how WWEX helps SMBs relieve even the biggest freight shipping headaches.

Pain #1: Rate Checking

Manually requesting quotes from multiple carriers in search of the best rates can easily eat into your already limited time. By partnering with WWEX, not only do you get access to great freight shipping rates, but you can also quickly compare costs and delivery options from our 65+ carefully vetted freight partners — all on our easy-to-use SpeedShip® platform.

Pain #4: Shipment Issues

While freight shipping issues are sometimes inevitable, there's no need to navigate them on your own. With the help of your dedicated WWEX operations team, your freight logistics will be handled by experts in the industry. Whether it's filing a shipping claim or tracking down a delayed package, WWEX is here to help.

Pain #2: Limited Capacity

No one wants to fight to get their freight on the truck. But in times of limited capacity, delayed shipments and missed pickups do sometimes happen. Luckily, due to our longstanding carrier relationships, WWEX can ensure you have the best chance of getting your freight picked up and delivered on time — without costly rate fluctuations.

Pain #5: Industry Best Practices

Odds are, you didn't start your SMB to become a full-time shipping manager. That's where WWEX comes in! We stay up to date on important industry news and best practices so you don't have to. We'll make sure your shipping logistics are running smoothly and efficiently, so you can focus on what you do best.

Pain #3: Carrier Invoices

Drowning in carrier invoices? By partnering with WWEX, you can cut down on shipping invoices by receiving one consolidated invoice for all your freight shipments — no matter the carrier. Plus, we offer a variety of customizable invoice types so you can get all the information you need (and none that you don't).
